Trijicon®, Inc. Introduces New RMR™ With Amber Triangle Reticle - Combining Lightning Fast Target Acquisition With Increased Long Range Accuracy

Wixom, MI – The Trijicon RMR™ (Ruggedized Miniature Reflex) is highly regarded for its ability to provide fast, both-eyes-open target acquisition and accurate aiming with any style or caliber of weapon. New for 2011, Trijicon has integrated its legendary amber triangle aiming reticle into the RMR platform, resulting in the ideal combination of speed and accuracy. Perfectly suited for combat, personal protection, competition or hunting, the RMR has quickly become the choice of experienced shooters who demand superior performance from reflex-style sights.

The RMR's unique amber triangle reticle functions as a highly visible reference for close-in shooting, while providing a precision aiming point that doesn't obscure the target at extended ranges. As a matter of fact, the triangle reticle results in a near zero MOA aiming point for minimal target obscurity at all practical ranges. The new RMR with triangle reticle is a battery-free sight, featuring Trijicon's famous dual-illuminated reticle that combines the unique illumination characteristics of Tritium with the light-gathering capabilities of advanced fiber optics, delivering maximum visibility and dependability when called to action.

Nearly indestructible, the RMR features a military-grade housing that's investment cast from aircraft aluminum alloy and hard-coat anodized finish. Tested to military standards, the extremely compact and lightweight RMR is designed to withstand the rigors of hard use under the most severe environmental conditions. The Trijicon RMR is tougher than any alternative and features easy-to-use adjusters with audible clicks allowing for quick and precise windage and elevation correction.

For more information on Trijicon's new RMR with triangle reticle, and the complete array of **Brilliant Aiming Solutions™** for the hunting, shooting, military and law enforcement markets, contact Trijicon, Inc. ® at (248) 960-7700 or visit www.trijicon.com.
