Trijicon® , Inc. Introduces New TrijiDot™ Fiber Optic Shotgun Sight- The Ultimate Hi-Visibility Sight For Any Shotgun Application

Wixom, MI – Shotgun shooting isn't always a point-and-shoot proposition. Many scenarios require a careful sight picture, leaving standard bead sights in the dark! New for 2011, Trijicon, the world leader in **Brilliant Aiming Solutions™**, is excited to offer its first fiber optic bead sight specifically designed for ribbed-barrel shotguns.

Designed to deliver the ultimate in brightness and durability, the **TrijiDot™ Fiber Optic Shotgun Sight** features proprietary Trijicon fiber optics that magnify and focus ambient light to provide a brilliant aiming point in a wide range of lighting conditions. The moderate-sized 4mm fiber optic is available in Red or Green and is capped with a protective sapphire lens that helps distribute light and provides protection from damage and solvents.

The TrijiDot fiber optic is housed in a protective base that's constructed of aircraft-grade 6061-T6 aluminum and features a hard anodized black oxide coating to withstand heavy shotgun recoil, intense barrel temperatures, and years of extreme use in the field. Installation is easy, and the sight is mounted using a system of magnets, bead locating pocket, and set screws that provide the most secure and rugged user-attachment method available. The TrijiDot is available in a variety of sizes to fit most popular shotgun models with rib widths between .230" and .400".

Perfectly suited for a wide range of applications, Trijicon's new TrijiDot provides a bright reference point for upland hunters, waterfowlers, turkey hunters and all clay-target shooting disciplines. The TrijiDot is also the perfect addition to ribbed-barrel shotguns for tactical and home defense applications.

For more information on Trijicon's new TrijiDot Fiber Optic Shotgun Sight, and the complete array of **Brilliant Aiming Solutions™** for the hunting, shooting, military and law enforcement markets, contact Trijicon, Inc. ® at (248) 960-7700 or visit www.trijicon.com.
