Trijicon® ACOG® Selected as the Carbine Optic to be used by the West Virginia State Police

Wixom, MI – Trijicon, Inc., global provider of innovative Brilliant Aiming Solutions™ for the hunting, shooting, military and law enforcement markets, announced that the Trijicon ACOG has been selected as the carbine optic to be used by the West Virginia State Police. The selection culminated in an order for the purchase of 800 **Trijicon TA44SR-10 ACOG** weapon sights for general issue to each of the state's troopers.

"Trijicon is honored to be selected by the West Virginia State Police," said Tom Munson, Trijicon Director of Sales and Marketing. "As agencies appreciate the value of the patrol rifle in modern policing and issue greater numbers of these weapon platforms, it is important that they provide their officers with sighting systems that allow them to adequately assess and identify potential targets."

Col. C.R. "Jay" Smithers of the West Virginia State Police commented, "After a thorough competitive evaluation process, the ACOG was the best fit for our department.. We are confident that the TA44 will reliably serve our troopers in the years to come."

At 4.9 ounces, the Trijicon TA44SR-10 ACOG weapon sight provides a rugged, lightweight platform that's perfect for a variety of tactical operations. This extremely compact model provides weapons like the M16/M4 with excellent fire control capability. Targets are easier to see and quicker to acquire through the 1.5 x 16 ACOG.

For more information on the Trijicon ACOG® series, and the complete array of **Brilliant Aiming Solutions™** for the hunting, shooting, military and law enforcement markets, contact Trijicon®, Inc. at (248) 960-7700 or visit www.trijicon.com.
