Modern Spartan Systems Announces “Spartan Copper/Lead Destroyer™” – A Superior “Nose Friendly” Alternative to Traditional Solvents

Suwanee, GA – [Modern Spartan Systems LLC.](#), manufacturer of today’s most technologically advanced firearms cleaners and lubricants has unveiled [Spartan Copper/Lead Destroyer™](#); the latest in its new arsenal of products designed to optimize the performance of any gun or rifle. Spartan Copper/Lead Destroyer is formulated to quickly dissolve and destroy the embedded copper *and* lead *and* chlorides within your firearm in minutes instead of hours!

Spartan Copper/Lead Destroyer provides the essential function of removing embedded copper, lead *and* chloride residue deep from within the pores of the barrel. This powerful micro-level cleaning formula is a key component in our “systems approach” to firearm performance maximization. It is best used with [Spartan Carbon Destroyer](#) both in preparation for the initial application of [Spartan Accuracy Oil](#) and continued cleaning maintenance.

The problem with removing these stubborn contaminants is that until now, only very strong smelling, high VOC chemical solvents were available. These products are limited in their effectiveness, can pit metals and they “stink”. Our Copper/Lead Destroyer is easy to use (run a couple saturated patches), fast acting (let soak for 5-10 minutes, then dry patch out), minimal effort (maybe some mild agitation needed with a nylon brush), won’t etch metal (even if left in overnight), and is people and environmentally friendly. To top this off, the most commonly shared compliment we hear all the time, is that, “It smells nice, and my wife lets me use it in the house.” Women shooters and women married to shooters absolutely love this!

Since most shooters would rather be shooting their guns instead of cleaning them, the fact that this product is “fast acting” will save them time. The question then becomes, “Is the product really working?” To answer that valid question and give confidence to the user, Copper/Lead Destroyer is enhanced with a highly visible copper presence indicator. If it turns blue, run another patch, if clear the copper is gone. And if the copper is gone, so is the lead (which is a softer metal) and so are the corrosive chlorides.

“The Copper/Lead Destroyer is awesome. After multiple cleaning with standard products, I was asked to try running this product on a patch and letting it soak for 5-10 minutes. I did, and what I thought was clean, it wasn't. We were pulling up pepper flake sized particles of lead. The lack of blue indicator showed on the next patch that all the copper was gone. It smelled nice too. I am sold.”

Thayne – Salt Lake City, Utah

Just like all of our other specialty formulas, we believe that using Spartan Copper/Lead Destroyer will be your “product of choice” because it is the best, and because your wife will love you for using it!

Modern Spartan Systems has a generous test and evaluation program in place for members of the professional media. All media inquiries should be directed to Driftwood Media, Inc. For the latest Modern Spartan Systems press releases, product images and videos, please visit www.driftwoodmediacom.com.

Benefits and features of **Spartan Copper/Lead Destroyer™**

- Designed to remove copper, lead & chlorides
- “Nose” friendly – no VOCs
- Safe on all metals, won't etch or pit barrels
- Powerful & fast acting – works in minutes
- Easy to use, minimal to no scrubbing
- Product effectiveness verifier – contains a blue copper indicator
- Environmentally friendly
- Manufactured in ISO 9001 certified plants
- American ingenuity & American made

About [Modern Spartan Systems](#)

Modern Spartan Systems (MSS) was founded in early 2013 with the purpose of forever changing the shooting industry. The goal is to transform the perception of firearm maintenance as a “necessary evil” to an anticipated understanding that proper cleaning and lubrication with the unique MSS formulas will produce a plethora of rewards, including, YES, IMPROVED SHOOTING ACCURACY. The partners in this company include: a 14-year military veteran with a love for competitive shooting and a defense contracting background, a visionary businessman with the ability to spot little known superior technologies, and a well respected retail entrepreneur who knows how to make good things happen. These three have assembled a phenomenal team of high class, high character industry experts, scientists, marketing, sales, PR and IT people that all have a love for what they are doing. Combined, they are bringing the tactical, shooting and hunting communities a line of products proven to far surpass the competition. For more information on the company's system of firearms lubricants and cleaners, contact Modern Spartan Systems at

4610 Lambton Circle, Suwanee, GA 30024 • Telephone: 847-669-1640 • or visit
